SUMMARY

Informatics Engineering graduate from Adventist University of Indonesia with a GPA of 3.70/4.00 (Cumlaude), specializing in full-stack web development using popular frameworks such as Laravel, TypeScript, and others. During my internship as a Full-Stack Developer, I designed a digital attendance system that successfully cut administrative processing time by up to 70% and made the attendance process more transparent between HR and employees. To continuously sharpen my skills, I actively participate in the Harisenin.com Full Stack Developer Bootcamp (Batch 19), where I worked on a real project called Chill-app (Movie Clone), a Netflix-inspired video streaming platform clone, using React 19, Vite, Express.js, and MySQL, with an Atomic Design architecture, JWT authentication, and a real-time watchlist feature built with Tailwind CSS v4. Beyond the technical aspects, I am known as a creative, proactive, and detail-oriented person who enjoys exploring new ideas in interface design and technical solutions, adapts quickly to new tools and technologies, and takes strong initiative in solving problems both independently and within a team. I am ready to contribute to software development, whether in web application development, backend systems, or cross-functional technical collaboration.

EDUCATION

Bachelor of Informatics Engineering — GPA 3.70/4.00 (Cumlaude)

Aug 2022 – Jun 2026

Adventist University of Indonesia, Bandung, Indonesia

- Thesis: Web-Based Expert System for Disease Diagnosis and Maintenance Optimization of Ornamental Plants in Parongpong.
- Relevant coursework: Database Systems, Web Development, Systems Analysis, HTML, and JavaScript.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap, PHP
- Front-End: React.js, React Native, Inertia.js
- Back-End: Node.js, Laravel, Express
- Database: Prisma ORM, MySQL, SQLite, Supabase, PostgreSQL
- Tools: Git, GitHub, REST APIs
- Languages: Indonesian (Native), English (Beginner)

WORK EXPERIENCE

Full-Stack Developer Intern

May 2025 – Aug 2025

Jamaster Simanullang Public Accounting Firm

- Built a full-stack employee attendance system using Laravel, React, TypeScript, and Inertia.js, eliminating manual HR tracking for 30+ employees.
- Designed and implemented role-based access control (RBAC) and automated leave-request approval workflows, cutting administrative processing time by 40–70%.
- Delivered a fast, app-like SPA experience via Inertia.js integration, reducing average page load time and improving engagement across 30+ daily active users.

PROJECT EXPERIENCE

Front-End Developer — Plant Disease Diagnosis, Final Year Research Project

Jan 2026 – Mar 2026

- Developed and integrated a responsive front-end interface using Vue.js and Scoped CSS, ensuring an optimal and accessible experience for users diagnosing plant diseases across mobile and desktop devices.
- Designed and executed interface testing, successfully identifying and fixing 10+ cross-device UI bugs to improve layout responsiveness and minimize user navigation issues.
- Collaborated on implementing the plant disease diagnosis logic flow, aligning front-end components with the overall system to support the accuracy of agricultural diagnosis results.

Chill-app Movie Clone — Final Project, Harisenin.com Full Stack Developer Bootcamp

- Built a fully responsive Netflix-inspired streaming platform clone with React 19 and Vite on the frontend, backed by Express.js and MySQL.
- Structured the codebase with Atomic Design (atoms, molecules, organisms, pages), improving component reusability and long-term maintainability.
- Implemented JWT-based authentication with bcrypt.js password hashing and custom middleware to secure private routes and API endpoints.
- Reduced redundant API calls by fetching movie data via Axios and performing in-memory filtering for category views (Trending, Top Rated, Continue Watching, New Releases).
- Built an interactive Watchlist ("Daftar Saya") feature with real-time add/remove functionality, keeping state synchronized across pages via React state management.
- Designed a dark-themed, mobile-first UI from scratch with Tailwind CSS v4, ensuring visual consistency across mobile, tablet, and desktop.

ORGANIZATION EXPERIENCE

Head of Logistics, Student Executive Board (BEM)

Sep 2025 – Apr 2026

Adventist University of Indonesia, Bandung, Indonesia

- Led a 3-member logistics team across 10+ organizational events, ensuring 100% equipment readiness and on-time execution throughout the term.
- Managed end-to-end logistical coordination for all BEM programs, overseeing procurement, distribution, and setup with zero event disruptions.

CERTIFICATIONS & COURSES

Courses

- Full Stack Developer Bootcamp — [Harisenin.com](https://harisenin.com), Jakarta (Mar 2026 – Jul 2026)

Curriculum Highlights:

- Basic Classes: Fundamentals of software engineering, website development concepts, introduction to frontend and backend architecture, and version control services (VCS); foundational markup and styling using HTML and CSS.
- Frontend Development (Intermediate & Advanced): UI design principles, core React.js concepts, component-driven development, state management, and API integration; advanced frontend implementation using TypeScript in React and Next.js for server-rendered applications.
- Backend Development (Intermediate & Advanced): Database fundamentals, database query design, and backend development with Node.js to build and consume APIs; application testing, deployment, real-time communication via WebSockets, and mailer integration.
- Additional Professional Modules: Professional English, mental health awareness, and structured career preparation.

Certifications

- IT Specialist – Database — [Certiport](https://certiport.com) (Mar 2025)
- JavaScript Programming Fundamentals — [Dicoding Indonesia](https://dicoding.com) (Mar 2025)
- Front-End Web Development for Beginners — [Dicoding Indonesia](https://dicoding.com) (Apr 2025)
- Web Programming Fundamentals — [Dicoding Indonesia](https://dicoding.com) (Feb 2025)
- Git & GitHub Fundamentals — [Dicoding Indonesia](https://dicoding.com) (Feb 2025)
- Introduction to Programming Fundamentals for Software Developers — [Dicoding Indonesia](https://dicoding.com) (Feb 2025)

SOFT SKILLS

- Problem Solving, Time Management, Attention to Detail, Analytical Thinking, Teamwork
